Tangier, Morocco

## Summary

I'm a Frontend Web Developer. I'm looking for full time opportunity to work with cool development teams and get even better at what I do.

---

## Skills

- **Programming Languages** : JavaScript, TypeScript, Python
  - **Frontend** : HTML, CSS, Bootstrap, TailwindCSS, SASS, React.js, Next.js, Redux Toolkit
  - **Backend** : ExpressJS, NodeJS, JWT, RESTful API, MongoDB
  - **Tools** : Vite, NPM, Git, Github, VS Code, Netlify
  - **Languages** : Arabic (Native), English (Advanced), French (beginner)
  - **Soft skills** : Searching, Problem-solving, Adaptability
- 

## Projects

### JobApplic Fullstack MERN - [live Website](#) - [Github Repo](#)

- Implemented smart form checks, creating a user-friendly experience by catching errors early in the job application process. Enhanced accuracy and completeness, making the platform more reliable.
- Introduced features allowing employers to easily post and manage jobs. Improved the hiring process by enabling editing of existing job listings and streamlined application tracking.
- Developed an admin dashboard, providing employers with real-time insights into job listings and applications. Advocated for informed decision-making through accessible data.

### XperienceBox E-commerce - [live Website](#) - [Github Repo](#)

- Utilized TypeScript to enhance code quality, improve developer productivity, and catch potential errors during development.
- Utilized context and custom hooks to manage complex application state, providing a scalable and organized solution for data flow between components.
- Leveraged industry best practices and coding standards to create a scalable and maintainable codebase.

### AtlasRecipes - [Live Website](#) - [Github Repo](#)

- Built a feature-rich web application that allows users to explore a wide range of recipes from various cuisines.
- Seamlessly integrated MealDB and YouTube APIs, enriching the platform with extensive culinary content and recent food vlogs.
- Ensured accessibility by implementing semantic HTML and optimizing keyboard navigation for users with disabilities.
- Improved performance through code splitting and lazy loading, enhancing the overall user experience.
- Implemented essential features, including a search and category filter for recipe discovery, as well as a favorites feature that saves recipes in local storage for user convenience.

### Republic BarberShop - [Live Website](#) - [Github Repo](#)

- Created a visually captivating and professional website design that enhances the online presence of the Barbershop.
  - Leveraged Swipe.js for seamless mobile responsiveness and a smooth user experience across various devices.
  - Integrated Email.js to facilitate effortless communication, ensuring clients can easily reach out to the Barbershop.
-

## **Experience**

### **Web Developer**

Contra

07/2023 - Present

- Working closely with clients to understand their goals and requirements, and providing regular updates and progress reports.
- Building visually appealing and responsive user-friendly interfaces using various Web Technologies.
- Identifying and resolving technical issues, bugs, and performance bottlenecks on websites.
- Providing ongoing maintenance and updates to keep websites secure and up-to-date.
- Conducting testing to ensure websites are error-free and perform as expected.

### **E-Commerce Manager & Social Media Manager**

Blakium

01/2021 - Present

- Overseeing inventory management, pricing strategies, and product assortment to meet customer demand and maximize profitability.
- Managing social media platforms, creating and curating content, and scheduling posts.
- Analyzing social media metrics and audience insights to measure performance and optimize strategies.
